Motorcycle / Recreational
Key Blank Reference

About this Reference

The Ilco® Motorcycle Key Blank Reference has been researched and compiled as accurately as possible. However, the historical use of locks and keys for motorcycles can be complex and unconventional in comparison to automotive keys.

Motorcycle manufacturers are known to use multiple keys, keyways, and code series in a single model year. They also "recycle" these for different model years. Therefore, it can be difficult to specify a single key blank that will be used for these models and model years.

In this reference, make, model, year and code series are provided to match the required key blanks. Where conflicting information has been found by Ilco, the information has been presented as simply as possible.

For example: X57, X58, X84 & X138 key blanks are listed for pre-84 Honda motorcycles. These keys were used for varying models, varying years. None of these key blanks were used for every model, every year or even in one model in every year. The most consistent method of identification in this case is the code series. In some cases, the manufacturer has used the same keys and codes for several models. Those models are listed to assist in the identification process.

It is also important to note that some manufacturers have made modifications to original keys. In this case, the old key will not function for new models. However, the new key will work in both (old and new). For these models, we have substituted the new (most useful) key blank.

The body of this reference provides the Manufacturer, Model, Years, and Code Series, Ilco / Silca Key Blank number. In addition, we have included a Comments column. In this column, you will find information on the key (transponder, cloneable), application (steering lock) as well as "trim" suggestions (trim bow 0.250).

Table of Contents

We wish to thank the numerous sources that have provided assistance in preparing this reference.

Clone & Program

It's the smart choice…

Smart Pro is a state-of-the-art vehicle key programmer that provides fast, easy and intuitive programming via the graphical user interface. Software is driven by MYKEYS Pro, the Advanced Diagnostics online key programming database with information for over 5000 vehicles; covering most makes and model worldwide.

Expertly engineered with high quality components ensures you of high security standards and outstanding performance. The customized operating system has been designed and developed by Advanced Diagnostics; the foremost authority in vehicle key programming.

Silca RW5 is the fast, easy solution able to duplicate transponders for around 99% of cloneable vehicle keys in circulation, including ID46 and ID48.

Cloning calculations are made using Silca proprietary servers to guarantee reliability, ensuring that the latest routines are always available and time-consuming software updates are avoided.

The cloning process is guided step by step via a color display with procedures up to 3 times faster than using previous devices. Full integration with the MYKEYS Pro ecosystem gives support and information across the entire vehicle key duplication process helping to deliver the best solution to the customer.

The Smart Aerial+ from Advanced Diagnostics simplifies and speeds the key cloning process.

Cloning calculations are made using Advanced Diagnostics proprietary servers to guarantee reliability, ensuring that the latest routines are always available and time-consuming software updates are avoided.

Smart Aerial+ works hand in hand with the MYKEYS Pro app to guide the user through the entire cloning process, providing all the necessary information needed to deliver a perfect duplicate key.
